## Stainless steel jet pump series GPS-BJZ

### Application

Self-priming stainless steel pressure system.  
 Able lift water up to 6 metres depth and work even with some aeration in the water.  
 The control system provides automatic operation switching the pump on as water is demanded from a tap and switching the pump off once the flow stops. Suitable for drinking water.

### Operating conditions

- Max. working pressure 6 bar
- Liquid temperature up to 40°C
- Ambient temperature up to 40°C
- Total suction lift up to 6m
- Continuous duty

### Motor

- Two-pole induction motor( 2850 rpm)
- Insulation class F
- Protection IP54

### Materials

- Pump body - stainless steel
- Motor support - aluminium
- Impeller - stainless steel
- Diffuser - noryl
- Pump flange - stainless steel
- Shaft with rotor - stainless steel
- Mechanical seal - carbon/ceramic

### Warranty

- 12 months from date of purchase

### Technical data GPS-BJZ

\*BJZ Pumps have 12 month warranty only.

## Submersible jet pump GPS-X-AJE

### Application

Self-priming jet water pumps with a very high hydraulic performance and a considerable pressure capacity. Able to operate at suction lifts of up to 8 metres, and work perfectly even in aerated water. Suitable for submerged or surface installation. Typically this pump is used to pressurise the water supply into to small dwellings or pump water from retention tanks into reuse systems from underground water storage tanks.

Suitable for use as a domestic pressure system in-conjunction with or without a small pressure tank a electronic flow control system automatically switches the pump on and off as water is demand request.

### Special Features

- Built in pump control system, no external control system required for automatic operation
- Built in run dry protection
- Built in self test sequence every 72 hours
- Adjustable starting pressure, preset to 2.2bar

### Operating conditions

- Liquid temperature between 2 and 37°C
- Ambient temperature up to 40°C
- Total suction lift up to 8m
- Pumped liquid to be free of solids and abrasives

### Motor

- Two pole induction motor (2850rpm)
- Water cooled, by pumped liquid
- Insulation - class F
- Protection IP68

### Materials

- Pump body – stainless steel 304
- Motor body – stainless steel 304
- Back bracket – stainless steel 304
- Shaft – stainless steel 416
- Impeller – stainless steel 304
- Diffuser – techno-polymer
- Mechanical seal – silicon/silicon
- Power cable – 10m
- Electronic board with microprocessor
- Flow sensor with cobalt Samario magnets

### Technical Data GPS-X-AJE

## Submersible horizontal multi-stage pump GPS-X-AMO

### Applications

Horizontal self-priming multi-stage pumps which can be used in both domestic and industrial situations. Suitable for submerged or surface installation. Must be used with clean water, without abrasive or suspended parts. Typically this pump is used to pressurise the water supply into a medium to large dwelling from an underground water storage tank.

Can be used for domestic purposes, such as fountains and water-plays, sprinkling and sliding irrigations; also for industrial applications such as washings, treatment of drinking water and cooling systems.

### Special Features

- Built in pump control system, no external control system required for automatic operation
- Built in run dry protection
- Built in self test sequence every 72 hours
- Adjustable starting pressure, preset to 2.2bar

### Operating conditions

- Liquid temperature between 2 and 37°C
- Ambient temperature up to 40°C
- Total suction lift up to 8m
- Pumped liquid to be free of solids and abrasives

### Motor

- Two pole induction motor (2850rpm)
- Water cooled
- Insulation class F
- Protection IP 68

### Materials

## Submersible vertical multi-stage pump GPS-X-AMV

### Application

Vertical self-priming multi-stage pumps which can be used in both domestic and industrial situations. Suitable for submerged or surface installation. Must be used with clean water, without abrasive or suspended parts. Typically this pump is used to pressurise the water supply into large dwellings from an underground water storage tanks.

Powerful and suited for use in confined spaces. Can be used for civil pressurizing, fountains and water-plays, sprinkling and sliding civil irrigations; and for industrial uses, such as washings, treatment of drinking water and cooling systems.

### Special Features

- Built in pump control system, no external control system required for automatic operation
- Built in run dry protection
- Built in self test sequence every 72 hours
- Adjustable starting pressure, preset to 2.2bar

### Operating conditions

- Liquid temperature between 2 and 37°C
- Ambient temperature up to 40°C

# Peripheral pump GPS-KFM

## Application

These volumetric water pumps are able to offer high pressures in relation to comparatively low power consumption and have particularly steady performance curves. They are suitable for domestic pressure boosting installations.

The KFM pumps can be used to increase the system pressure for automatic water distribution by pressure tanks or by electronic flow control units. For the correct functioning of the pump, use only clean water or non-aggressive liquids, without sand or other solid impurities.

## Operating conditions

- Liquid temperature up to 60°C
- Ambient temperature up to 40°C
- Total suction lift up to 7 m
- Continuous duty

## Connections

- Suction 1" BSP
- Discharge 1" BSP

## Motor

- Two-Pole induction motor (2850 rpm)
- Insulation class F
- Protection IP 44

## Materials

- Pump body - cast iron
- Motor support - cast iron
- Pump body cover - brass
- Impeller - brass
- Shaft with rotor - stainless steel
- Mechanical seal - carbon ceramic

## Stainless steel jet pump GPS-CA/CAM

### Application

Self-priming jet water pumps with very high hydraulic performance and considerable pressure capacity. Able to pump up to 8 metres depth and work perfectly even in aerated water. Suitable for drinking water. Can be used with electronic pressure control units and pressure tanks.

### Operating conditions

- Max. working pressure 6 bar (CAM 80-85-88)
- Max. working pressure 8 bar (CAM 95-98-198)
- Liquid temperature up to 35°C
- Ambient temperature up to 40°C
- Total suction lift up to 8m
- Continuous duty

### Motor

- Two-pole induction motor( 2850 rpm)
- Insulation class F
- Protection IP44

### Materials

- Pump body - stainless steel
- Motor support - aluminium
- Impeller - (CAM 80-85) noryl
- Impeller - stainless steel
- Diffuser - noryl
- Pump flange - stainless steel
- Shaft with rotor - stainless steel
- Mechanical seal - carbon/ceramic

## Cast iron twin impeller jet pump GPS-CA/CAM

### Application

Self-priming jet water pumps with a very high hydraulic performance and a considerable pressure capacity due to jet-assisted twin impeller design. Able to operate at suction lifts of up to 8 metres, and work perfectly even in aerated water.

Suitable for use as a domestic pressure system using either pressure tank system or electronic flow control systems to automatically switch the pump on and off.

As the motor size increases, a pressure tank becomes the preferred option for pump control.

### Operating conditions

- Max. working pressure 8 bar
- Liquid temperature up to 35°C
- Ambient temperature up to 40°C
- Total suction lift up to 8m.
- Continuous duty

### Connections

- Suction 1 1/2" BSP
- Discharge 1" BSP

### Motor

- Two-pole induction motor
- Insulation class F
- Protection IP44

### Materials

## Deep well pump GPS-AP/APM

### Application

Self-priming water pumps for suctions up to 45 metres deep.

Suitable to pump water from wells and supply water pressure for domestic or industrial applications. Before installing the pump, all pipes must be free of leaks and obstructions. A check valve is required at the foot of the ejector. On installation fill completely both pipes and pump body with clean water. To ensure efficient priming, it is necessary to maintain a back pressure in the hydraulic circuit, it is recommended to install a membrane tank at the delivery of the pump together with a flow regulation valve.

Deep suction lifts are made possible by fitting the ejector in the well onto the end of the suction pipe. Recirculation of water passing through the Venturi creates a pocket of low pressure. This attracts water from around the ejector and pushes it through the return (suction) pipe with enough pressure to take it up to the surface. For these deep suction applications two pipes need to be connected: the delivery pipe to the ejector and the return (suction) outlet. In this case, the diameter of the well must be at least 100mm. If the pump has to go in a 2" well, a special ejector housing is required with an airtight lock on the well.

### Operating conditions

- Max. working pressure 8 bar
- Liquid temperature up to 35°C
- Ambient temperature up to 40°C
- Maximum suction lift upto 45 mt.
- Continuous duty

### Connections

- Suction 1 1/2" BSP
- Discharge 1" BSP

### Motor and Materials

- Same as CA/CAM page 8

## Stainless steel multi-stage pump GPS-SM

### Application

Centrifugal self-priming multi-stage water pump able to deliver high pressure and a high suction lift with a comparatively low power consumption. Universal pump for domestic and industrial purposes.

Suitable for use as a domestic pressure system using either pressure tank system or electronic flow control systems to automatically switch the pump on and off.

### Operating conditions

- Max. working pressure 8 bar
- Liquid temperature up to 35°C
- Ambient temperature up to 40°C
- Total suction lift up to 8 mt.
- Continuous duty

### Motor

- Two pole induction motor 2850rpm
- Insulation class F

## Multi-stage centrifugal pump GPS-RS/RSM

### Application

Centrifugal horizontal multi-impeller water pumps able to develop high pressure and a high water lift with a comparatively low power consumption.

Suitable in domestic situations, for electronic pump control systems and for sprinkler irrigation systems and car washing.

### Operating conditions

- Max. working pressure 10 bar
- Liquid temperature up to 35°C
- Ambient temperature up to 40°C
- Total suction lift up to 7m.
- Continuous duty

### Motor

- Two-pole induction motor 2850 rpm
- Insulation class F
- Protection class IP44

### Materials

- Pump body - cast iron
- Motor support - cast iron
- Impeller - noryl
- Diffusers - noryl
- Pump casing - stainless steel
- Shaft with rotor - stainless steel
- Mechanical seal - carbon/ceramic
- Mechanical seal - silicon/silicon (RS-RSM 40-50-60-80)

## High head single impeller pump GPS-C/CM

### Application

Single impeller centrifugal pumps suitable to cover any small, medium or large capacity request. Suitable for domestic, agricultural and industrial purposes; with automatic water distribution through small- and medium-sized tanks; for sprinkler and flood irrigation systems in gardening and agriculture; to increase in derivation system pressure in aqueducts.

### Operating conditions

- Max. working pressure 6Bar (C/CM22-27-32-35)
- Max. working pressure 8 bar (C/CM45-53-400-550)
- Liquid temperature up to 60°C
- Ambient temperature up to 40°C
- Total suction lift up to 7m
- Continuous duty

### Motor

- Two pole induction motor (2850 rpm)
- Insulation class F
- Protection IP44

### Materials

- Pump body cast iron
- Motor support cast iron (C-CM35-45-53-400-550)
- Motor support aluminium(C-CM22-27-32)
- Impeller noryl (C-CM22-27-32)

## High head twin impeller pump GPS-2C/2CM

### Application

Twin impeller centrifugal water pumps to lift clean water and non-aggressive liquids. The main feature are the two opposite impellers which allow higher lifts than in the single-impeller model.

They are suitable for civil and industrial installations for water distribution by tank pressure groups and for irrigation in gardening and agriculture.

### Operating conditions

- Max. working pressure 6 bar (2C-2CM 42)
- Max. working pressure 10 bar (2C52-62-72-82-92-102-112-122)
- Max. liquid temperature 35°C (2C-2CM 42)
- Max. liquid temp. 60°C (2C52-62-72-82-92-102-112-122)
- Ambient temperature up to 40°C

### Motors

- Two pole induction motor (2850 rpm)
- Insulation class F
- Protection IP 44

### Material

- Pump body - cast iron
- Motor support - cast iron
- Impeller - brass
- Shaft with rotor - stainless steel
- Mechanical seal - carbon/ceramic

## Low head - medium flow pump GPS-CB/CBM

### Application

Centrifugal single-impeller low-head water pumps for high flow rate irrigation and heat transfer systems. Suitable to pump clean water or non-aggressive liquids charged with small particles.

### Operating conditions

- Max. working pressure 6 bar
- Liquid temperature up to 60°C
- Ambient temperature up to 40°C
- Total suction lift up to 7m.
- Continuous duty

### Motor

- Two pole induction motor (2850 rpm)
- Insulation class F
- Protection IP44

### Materials

- Pump body - cast iron
- Motor support - cast iron
- Impeller - cast iron
- Impeller - Bronze (CB/CBM 150)
- Shaft with rotor - stainless steel
- Mechanical seal - carbon/ceramic

## Standardised centrifugal pumps GPS-CS

### Operating conditions

- Max. working pressure 10 bar
- Liquid temperature up to 90°C
- Ambient temperature up to 40°C
- Total suction lift up to 7 mt.
- Continuous duty

### Motor

- Two pole induction motor (2850rpm)
- Insulation class F
- Protection IP54
- IEC 34 construction standard

### Materials

- Pump body - cast iron, dimensioned to DIN 24255
- Flange holes - UNI 7467, PN10 threaded flanges
- Pump body, motor support - cast iron;
- Impeller - cast iron;
- Shaft - stainless steel;
- Mechanical seal -

## Standardised centrifugal pump GPS-CS32

# Standardised centrifugal pumps GPS-CS40

## Standardised centrifugal pumps GPS-CS50

## Standardised centrifugal pumps GPS-CS65

## Standardised centrifugal pumps GPS-CS80

## Pool pump GPS-MPC/MPCM

### Application

For water circulation in swimming pool filtration systems.  
Suitable for pumping clean or slightly dirty water with solid particles in suspension.

### Operating conditions

- Water temperature up to 60°C
- Ambient Temperature up to 40°C
- Max. working pressure 250kPa

### Construction

Self-priming swimming pool pump with built-in strainer. The motor is specially insulated from the pumped water. Materials have been chosen for resistance to corrosion and wear from sand.

### Motor

- Built-in overload motor protector with automatic reset 230 volt model
- Permanent split capacitor (PSC)
- Insulation class F
- Protection IP x4

 $P_1$ : Max. power input. $P_2$ : Rated motor power output. $H$ : Total head in m.

Tolerances according to ISO 9906, annex A.

### Self-Priming Capability with the pump located above the water level

(1) Application limit for automatic self-priming at each start-up, without check valve.

L (m): Horizontal length of suction pipe above the water level.

Hs (m): Suction lift.

t (min): Self-priming time.

## Spa Pump GPS-SPA/SPAM

### Materials

Component	Material
Pump casing Union coupling	ABS (Acrylonitrile-Butadiene-Styrene)
Diffuser cover Impeller	Glass reinforced thermoplastic: PPO-GF30, NORYL®
Diffuser-wall with wear-ring	Cr-Ni-Mo stainless steel 1.4401 EN 10088 (AISI 316)
Mechanical seal	Ceramic alumina, Carbon, FPM

\* Trademark of General Electric

### Construction

Self-draining, single-impeller pumps, with motor insulated from pumped water; constructed with high quality, corrosion-proof plastic materials, with stainless steel diffuser. Compact design (158 mm wide).

#### PVC pipe connections:

Ports for cementing joint, with external thread for union coupling.

### Applications

For spas, hydromassage bathtubs and whirlpool baths.

### Operating Characteristics

Water temperature up to 60 °C.

Room temperature up to 40 °C.

Maximum permissible pressure in the pump casing: 2.5 bar.

Continuous duty.

### Motor

2-pole induction motor, 50 Hz ( $n = 2800$  1/min).

**SPA:** three-phase 230/400 V ± 10%.

**SPAM:** single-phase 230 V ± 10%, with thermal protector.

Capacitor inside the terminal box.

Insulation class F.

Protection IP X5.

Constructed in accordance with: EN 60335-2-41 IEC 60335-2-41

EN 60335-2-60 IEC 60335-2-60

### Patents:

EP 0 460 597  
US 5 226 790

### Certification marks for SPAM

**Coverage chart  $n = 2800$  rpm**

Strainer cover	Cast iron			Bronze		
	GJL 200 EN 1561			G-Cu Sn 10 EN 1982		
Strainer	Chrome-nickel steel 1.4301 EN 10088 (AISI 304)					
Mechanical seal				Carbon - Ceramic - FPM		

### Construction

Close-coupled self-priming centrifugal pumps with built-in strainer.

### Applications

For water circulation in swimming pool filtration systems.  
For clean or slightly dirty water with solids in suspension.

### Operating conditions

Liquid temperature up to 60° C.  
Ambient temperature up to 40° C.  
Total suction lift up to 7 m.  
Maximum permissible working pressure up to 6 bar  
Continuous duty.

### Motor

2-pole induction motor, 50 Hz ( $n = 2900$  rpm).  
**NMP:** three-phase 230/400 V ± 10% up to 3 kW,  
400/690 V ± 10% from 4 to 11 kW.  
**NMPM:** single-phase 230 V ± 10%, with thermal protector.  
Insulation class F.  
Protection IP 54.  
Constructed in accordance with: IEC 60034

### Special features on request

- Other voltages
- Frequency 60 Hz (as per 60 Hz data sheet)
- Protection IP 55
- Special mechanical seal
- Higher liquid or ambient temperatures

## Self priming centrifugal pump GPS-A/AM

### Application

For clean or slightly dirty water (with solids up to 10 mm grain size for A 50-125 and 15 mm for A 65-150). For draining a basin or a sump. For irrigation, civil and industrial applications.

### Construction

- Close-coupled centrifugal pumps with open impeller.
- The built-in back-flow preventer avoids reverse siphoning when the pump is stopped and assures automatic re-priming at the next start.
- The pump re-primes itself even if partially filled with liquid and with completely empty suction pipe.

### Operating conditions

- Liquid temperature from -10 °C to +90 °C.
- Room temperature up to 40 °C.
- Max. working pressure up to 6 bar.
- Continuous duty.

### Motor

- 2-pole induction motor, 50 Hz (2900rpm).
- Insulation class F
- Protection IP 54
- Available in bronze on request

### Materials

- Pump body - cast iron
- Motor support - cast iron
- Impeller - cast iron
- Shaft with rotor - stainless steel
- Mechanical seal - carbon/ceramic

## Drainage submersible pump GPS-TS/TSN

### Application

Hand-carry submersible automatic water pumps.  
Able to drain infiltrating water, cellars or reservoirs.  
Can be used with clean or slightly dirty water and for garden irrigation.

### Operating conditions

- Liquid temperature up to 35°C
- Submersion depth 5m
- Grain size inlet
  - TSN 300 3mm
  - TS 400 8mm
  - TS 800 10mm
- Min. suction level
  - TSN 300 15mm
  - TS 400 20mm
  - TS 800 20mm

### Motor

- Built-in overload motor protector with automatic reset
- Permanent split capacitor (PSC)
- Insulation class F
- Protection IP 68

### Materials

- Handle - mopen
- Pump body - mopen
- Impeller - noryl
- Motor casing - Stainless steel
- Shaft with rotor - Stainless steel
- Seal - double oil seal

### Technical data GPS-TS/TSN

## Vortex submersible pump GPS-TF

### Application

Hand carry submersible water pumps with vortex impeller suitable to lift waste liquids, even with suspended solids. Able to drain infiltrating water, cesspools or reservoirs. Decanting water from clean, dirty or muddy swimming pools.

### Operating conditions

- Liquid temperature up to 35°C
- Submersion depth 5 m
- Grain size inlet 25 mm (TF 400/S)
- Grain size inlet 30 mm
- Min. suction level 40mm

### Motor

- Built-in overload motor protector with automatic reset
- Permanent split capacitor (PSC)
- Insulation class F
- Protection IP68

### Materials

- Handle - moplen
- Pump body - moplen
- Impeller - noryl
- Motor casing - stainless steel
- Shaft with rotor - stainless steel
- Seal - double oil seal

### Technical data GPS-TF
